Agentic World Modeling: Foundations, Capabilities, Laws, and Beyond

A comprehensive survey arguing that world modeling is the central bottleneck as AI agents shift from passive text generation to active, sustained goal-directed interaction.

<http://arxiv.org/abs/2604.22748v1>

An Undecidability Proof for the Plan Existence Problem

Proves that determining whether a sequence of epistemic actions can achieve a given modal-logic goal from an initial Kripke state is undecidable.

<http://arxiv.org/abs/2604.22736v1>

Aligning Dense Retrievers with LLM Utility via Distillation

Proposes distilling LLM utility signals into dense retrievers to improve precision in Retrieval-Augmented Generation beyond standard similarity search.

<http://arxiv.org/abs/2604.22722v1>

CRAFT: Clustered Regression for Adaptive Filtering of Training data

Introduces a regression-based clustering method to extract small, high-quality subsets from massive corpora for efficient model fine-tuning.

<http://arxiv.org/abs/2604.22693v1>

How Supply Chain Dependencies Complicate Bias Measurement and Accountability Attribution in AI Hiring Applications

Analyzes how complex third-party supply chains in AI hiring tools create structural barriers to measuring bias and assigning accountability under new regulations.

<http://arxiv.org/abs/2604.22679v1>

■ Hacker News

Flipdiscs

An open-source platform and hardware toolkit for building kinetic interfaces with electromechanical flip-disc displays.

<https://flipdisc.io>

I bought Friendster for \$30k – Here's what I'm doing with it

The founder recounts acquiring the defunct social network's assets and his plans to revive or repurpose the legacy platform.

<https://ca98am79.medium.com/i-bought-friendster-for-30k-heres-what-i-m-doing-with-it-d5e8ddb3991d>

Bob Odenkirk would like to remind you that life is a meaningless farce

A profile of the comedian reflecting on mortality, creativity, and finding meaning in absurdity after his 2021 heart attack.

<https://www.nytimes.com/2026/04/25/magazine/bob-odenkirk-interview.html>

It's OK to abandon your side-project (2024)

A developer's reflection on why abandoning unfinished side projects is a healthy and necessary part of the creative process.

<https://robbowen.digital/wrote-about/abandoned-side-projects/>

AI should elevate your thinking, not replace it

An essay arguing that AI tools are most valuable when they augment human reasoning rather than automating it away entirely.

<https://www.koshyjohn.com/blog/ai-should-elevate-your-thinking-not-replace-it/>

I did 15 AI Engineer interviews in the last 6 months

A candidate's retrospective on the current AI engineering interview landscape, noting a shift away from deep math proofs toward practical system design.

https://www.reddit.com/r/MachineLearning/comments/1swxcvo/i_did_15_ai_engineer_interviews_in_the_last_6/

Submitting to top ML Conferences without Sharing code

Researchers debate whether code submission should remain mandatory for venues like NeurIPS as AI-assisted coding blurs reproducibility lines.

https://www.reddit.com/r/MachineLearning/comments/1swtk3h/submitting_to_top_ml_conferences_without_sharing/

Value of top conference workshop papers for PhD admissions

An undergraduate asks how much first-author workshop papers at major ML conferences weigh in PhD admissions compared to full papers.

https://www.reddit.com/r/MachineLearning/comments/1swwsin/value_of_top_conference_workshop_papers_for_phd/

Can Geometric Deep Learning lead eliminate the need of "Brute Force" pre-training

Discussion on whether geometric priors (grids, graphs, groups, manifolds) could reduce reliance on massive-scale pre-training.

https://www.reddit.com/r/MachineLearning/comments/1swkxx1/can_geometric_deep_learning_lead_eliminate_the/

freshman in ML: how do you identify actually open research problems?

Advice thread for early-stage researchers on distinguishing tractable, novel problems from already-solved or ill-defined ones.

https://www.reddit.com/r/MachineLearning/comments/1swuw9g/freshman_in_ml_how_do_you_identify_actually_open/

ABOUT THIS EDITION

Daily curated intelligence for April 27, 2026. Featuring 5 arXiv papers, 5 HN stories, 5 Reddit discussions. All sources linked for deep reading.
